## Opticstudio In Stock Lens

As light passes through a lens, it is affected by the lens' profile or substrate.. Optical Lenses, which may consist of a single or multiple elements, are used in a wide variety of applications from microscopy to laser processing.. The tool will give great results, assuming that the design can work well with stock lenses.. Dec 23, 2015 The Stock Lens Matching tool will swap out the lenses in a design for the nearest equivalents in the selected vendors' catalogs, and offers the potential to make great cost savings in the finished design by eliminating the need for custom manufacture.. Many industries utilize Optical Lenses, including life sciences, imaging, industrial, or defense.
